Let's teach!

We rely on teachers to not only share knowledge to our children, but also to instil the belief that each generation has a responsibility to help the next by spreading said knowledge and wisdom. For this, teachers not only deserve our gratitude, they deserve our full support.

We provide this support through the creation of print and digital teaching resources that will meet the classroom challenges of the day. From ensuring that the curriculum requirements are fulfilled, to helping you craft engaging lessons for your students, our team of writers is focused on providing you with evidence-based solutions that are practical and contemporary.

Let's teach! Primary

A great digital addition to your teaching toolkit!

» Easy-to-use digital teaching tool

» Suitable for Foundation to Year 6

» Currently featuring HASS and Science

Looking to elevate your classroom experience through a digital solution? *Let's teach! Primary* will help you schedule, deliver and assess lessons for the whole year! Easy to use and intuitive, the platform provides you with access to Australian Curriculum-linked resources in a curated online format. With Science and HASS learning areas currently available, all lessons are provided with links to the New South Wales (NESA), Victorian (VELS) and Western Australian (WA) curriculums.

English

Strengthening our English programs

Even without the disruptions we face due to the pandemic, it is always a challenge to implement a robust program that will teach essential English skills. These new conditions should give us the notion that learning environments can be changed at a moment's notice, and our English programs and classrooms have to be flexible enough to adapt.

Our focus has always been about understanding real classroom challenges and creating solutions to meet them. This past year, we have placed more focus on our English student workbooks, providing opportunities for practice and consolidation. We have also worked hard on innovating and expanding our digital offering to help teachers and students.

With more options to deliver our well-regarded resources, teachers can expose their students to a wider range of English skills, giving them the opportunity to consolidate, challenge and extend their knowledge in literacy, language and literature.

The Literacy box

Take your students on a literary adventure!

» Three-box series

» Great for independent learning and guided reading

» Includes 75 colourfully illustrated four-page cards

The Literacy box covers all your teaching needs. With these colourfully illustrated cards featuring texts covering a variety of genres and text types, literacy will become less of a chore and more of a fun learning adventure for students. *The Literacy box* series provides supplementary materials to support the reading program of teachers, catering for the needs of all readers at each level in the classroom.

Sample card from Box 1

Comprehension

✘ The word *whole* in Paragraph 3 means:

(a) all of it
(b) an opening in the ground
(c) large

✘ Which two characters come to the house after the cat in the hat?

(a) Sally and her brother
(b) Thing One and Thing Two
(c) their pet fish

✘ Who is the author of the book?

(a) Sally
(b) the cat in the hat
(c) Dr Seuss

✘ Which paragraph is mainly about the pictures?

(a) Paragraph 4
(b) Paragraph 3
(c) Paragraph 2

✘ The word *he* in Paragraph 7 means:

(a) Dr Seuss
(b) the books
(c) the words

✘ This writer wants you to:

(a) read the book.
(b) learn about cats.
(c) smile.

All about words

(a) ticks
(b) words
(c) colours

2 A word that rhymes with cat and hat is:

(a) net
(b) chat
(c) tails

3 Which word has the same sound as read, clean and leaves?

(a) ...
(b) ...
(c) ...

Card—inside

Grammar

1 Which one should not have a capital letter when it is in the middle of a sentence?

(a) Children
(b) Thing Two
(c) Mum

2 Which one needs an exclamation mark?

(a) They had nothing to do.
(b) You should read them cat.
(c) Are the pictures funny?

3 Which word is a noun, like story? (He tells the story.)
The pictures are funny too.

(a) pictures
(b) are
(c) funny

4 Which adjectives tell more about the book?
I think this is a clever, funny book.

(a) it, book
(b) think, this
(c) clever, funny

5 Which word is a verb, like brings?
(The cat brings two friends.)
The pictures make it easy.

(a) picture
(b) make
(c) easy

Something extra

★ Read *The cat in the hat* or another book written by Dr Seuss.

★ Draw a character from *The cat in the hat*. Write his or her name on the picture.

THE CAT IN THE HAT

1. The cat in the hat is the best book! It is great fun to read. You should read it!

2. Lots of children learn to read with this book. The lines are short. The words are easy. This same words are used over and over. They make a good story.

3. Many words have the same sounds of the end. The whole book is like a very long poem. It is very clever.

4. The pictures are funny too. There are not many colours on them. It makes it easy to see the pictures.

5. The story is about two children. One is called Sally. Her brother tells the story. Mum has gone out. They are home alone. It is raining and they have nothing to do. A cat wearing a big hat comes in. He does ticks for the children. He makes a big mess in the house. The family pet fish does not like the cat.

6. The cat brings two friends—Thing One and Thing Two. They fly a kite in the house. They make a mess. The children catch Thing One and Thing Two with a net. Then they make the cat clean up the mess. He leaves just before Mum comes home.

7. Dr Seuss made up some of the words for this book. He made up words for his other books too. You should read them all! You will love them as well!

The Comprehension strategies box

Unlock students' reading abilities

» Downloadable full-colour posters available

» Easy to use with small groups or individuals

» 162 cards per box, colour-coded by strategy

The *Comprehension strategies box* is a set of six boxes suitable for children aged 5–11+. Each box contains a set of full-colour, differentiated literacy cards designed to support the teaching and learning of nine different comprehension strategies. These well-researched and proven strategies—predicting, visualising, making connections, questioning, clarifying, summarising, determining importance, inferring and synthesising—are compiled to help teachers unlock their students' reading abilities.

Features

- 81 original texts across both the cards and teacher guide, allowing students to experience a variety of fiction and non-fiction text types.
- Cater for all while learning the same strategies, with three differentiated reading levels by suggested Lexile ranges for each strategy, and a placement test provided to ascertain students' starting point
- Extensive support through a comprehensive teacher guide and an additional activity book with worksheets for all texts on the cards

Summarising 2A

The Ballad of Brown Cow

Brown Cow was a fussy sort.
 He loved his hide. He truly did.
 'I must keep it brown!' he thought.
 He had some ideas jumbled in his head.
 Brown Cow was a fussy sort.
 He loved his hide. He truly did.
 He drank chocolate milk when he went to town.
 He painted his hide brown. He let it dry.
 He ate hay all day. It was always brown.
 He rolled in mud when rain fell from the sky.
 Brown Cow was a fussy sort.
 He loved his hide. He truly did.
 The others thought him very strange.
 They didn't do things that were odd or weird.
 You are what you are. You cannot change.
 'We're glad to be what we are!' they cheered.
 BUT ...
 Brown Cow was a fussy sort.
 He loved his hide. He truly did.

Differentiated cards

Summarising 3A

Colour-changing Chameleons

Chameleons are lizards.
 Chameleons have clever skin that can change colour. Their skin can make patterns of many colours. They can change the colour of their skin to hide from enemies. They show dark colours when they are angry or trying to attract females. Males show colours to attract females. Chameleons change to black to help them stay warm. They also change to keep cool.
 Chameleons have large, bulging eyes that can rotate. This allows them to see in two directions at one time. They can see insects metres away. They also have very long tongues that they can use very quickly to catch insects. Colour-changing chameleons are very interesting!

Summarising Modelling Text

Dear Mr Colour Wheel

SPEAKER: Welcome, dear Mr Colour Wheel. We're pleased to speak to you today. People want to know all about you.

MR COLOUR WHEEL: Thank you. I'm very glad to answer your questions. I don't know what people want to know. I'm a very simple fellow.

SPEAKER: Please tell us what you do.

MR COLOUR WHEEL: I'm the circle that shows the important colours people need. The colours are yellow, blue and red. We use them to make all other colours.

SPEAKER: What do you mean?

MR COLOUR WHEEL: Mix yellow and blue and you get green. Mix blue and red and you get purple. Mix red and yellow and you get orange.

SPEAKER: Very clever! People can't use colours without you.

MR COLOUR WHEEL: Of course not! But don't ask about black or white! They're real impostors! No colour at all!

Summarising Sharing Text

The Blue Flamingo

The Blue Flamingo is a good book. Les Drake wrote it. Tim Clares drew the pictures.

The book is about Bluet. Bluet is a flamingo. Most flamingos are pink. They are pink because they eat pink shrimps. Bluet is not pink. Bluet is blue. He is very sad. He does not want to be blue. Bluet tries to find out why he is not like the other flamingos. He does some funny things. He meets some funny characters. Then he finds out it is okay to be different. It is okay to be who you are.

The writer makes funny things happen. He writes about funny animals. He teaches about some good things.

The pictures are funny and colourful. They are like a cartoon.

I read The Blue Flamingo. I think you will like it too.

Summarising Assessment Text

Not a Great Colour!

Yesterday, we went to the beach. Mum carried the towels. Dad carried the food. Joey carried the beach umbrella. Seb carried the ball. I carried the buckets and spades.

We found a good spot. It was close to the water. There weren't too many other people to crowd us.

We swam and built sandcastles. We played games with the ball and ate the food. We stayed all day.

When we got home, we were really tired. We washed our buckets, spades and ball. Then we put them in the garden to dry.

Soon it was my turn to shower. When I was dry, I spied my face and shoulders in the mirror. What a shock! Red is not a great colour! It was starting to hurt.

That's when I realised that no-one had carried the sunscreen.

The Comprehension box

Help your students become better readers

» Three-box series

» Suitable for Years 1 to 6

» Great for independent learning and guided reading

The *Comprehension box* is a series of three boxes that provide supplementary materials to support the reading program of teachers, catering for the needs of capable, independent readers at each level in the classroom. Each *Comprehension box* incorporates three levels of comprehension question cards in a multiple-choice format and assesses the 12 different comprehension strategies. They are easy to use for any level, so jump right in and make a difference with your students today.

Back of card

Questions

Sapphire 10

Dragonrider

Answers

Answer card

Front of card

1. Ryan had wanted to be a dragonrider since he'd first seen a magnificent red dragon flying over his village when he was just one year old. Back then, he hadn't known how hard it was to become one of these legendary riders. Now, as he entered his second year of ten years of training, he knew exactly how hard it was.

2. Each trainee rider was assigned to work for one rider and dragon. Trainees woke early and worked hard until dusk. Ryan had been assigned to Florian, a fearsome gold rider with a bad-tempered gold dragon named Nightfire. It was hard working for Florian, a malicious man who enjoyed using his whip to control trainees and dragons.

3. Ryan dragged the bucket of small animals he'd caught yesterday to Nightfire's pen. Nightfire had a big appetite, which meant Ryan had to catch a lot of animals ... and clean up huge piles of steaming waste. Ryan didn't mind. Despite Nightfire's temper, Ryan respected the majestic dragon and treated it with kindness.

4. 'Greetings, Nightfire,' said Ryan as he entered the pen. Instead of tipping the meat on the floor like other trainees, Ryan threw each piece for Nightfire to catch. Nightfire seemed to enjoy this game as it snapped the meat in its strong jaws. Ryan chatted away as he started cleaning the pen, hoping Nightfire wouldn't send any fireballs his way.

5. He was still chatting when Florian burst into the pen, scowling.

6. 'Why isn't Nightfire saddled?' he yelled, whip in his hand. 'I told you I was flying today! It seems my whip needs to teach you yet another lesson!' Florian raised his whip to strike Ryan.

7. A burst of fire shot across the pen. Florian screamed as the fireball disintegrated his whip and burnt his hand. Nightfire roared and shot another fireball towards Florian, who ran from the pen. He knew what this meant. Nightfire had chosen a new master.

8. Nightfire lowered its head in front of Ryan and snorted softly. Ryan touched the golden head, then climbed up onto the strong neck. Nightfire leapt into the air, and Ryan realised that kindness respect was far more powerful than cruelty.

1. (b) malicious
2. (c) Nightfire
3. (b) disintegrated
4. (b) droppings
5. (a) before
6. (b) Paragraph 2
7. (b) hard work
8. (b) Nightfire liked kind and respectful Ryan more than cruel Florian.
9. (a) disliked Florian
10. (a) Kindness is more powerful than cruelty.

The Comprehension box

For a free sample, go to:
www.ricpublications.com.au/compboxsample/

Features

- 150 brilliantly illustrated colour cards in each box, covering a variety of genres and text types
- Levelling guides and assessment sheets to track students' progress
- Clear classification through colour-coding, with 15 levels of difficulty within each box, colour-coded for ease of use

Samples from Box 2

Card explanation

Front

The coloured tab at the top of the card indicates the different sections. There are ten cards the same colour in each section. This ensures that all cards can be returned to the box in the correct section.

The cards are numbered from 1 to 10 in each section. All cards should be returned to the correct coloured section and placed in the correct numerical order.

Each card has an interesting or fun title which may or may not tell exactly what the card is about. It motivates the pupils to read on to find out more.

Each text is written in numbered paragraphs and/or steps so information can be readily located when answering the questions. Texts which are procedures will have numbered steps or instructions.

Colourful artwork supports the text. The artwork may be diagrams, drawings, cartoons or photographs to motivate pupils, add interest to the topic or to comprehension.

Scarlet 1

Why is the sky so high?

1. Long ago, there was an area of the world where the sky was low. It was so low that if you climbed a ladder and stretched up really high, you could touch it.
2. In that area of the world there was a village where an old woman lived. It is much hot with a strong east wind blowing round her house all day—swearing, clucking, sneezing and snuffling.
3. One day, hot summer, the village and the land around it were attacked by drought. Dull covered the hills and blew into the faces of the villagers. They coughed and sneezed and rubbed on dust. Dull was in the air.
4. The old woman tried to keep her feet clean. She swept inside and outside, she swept the roof and the front yard. The dust rose as she swept and made the sky sweeter. It seemed so hard that it shook the world, scaring all the people. They ran inside their huts and hid. But the old woman continued sweeping. The sky sweeter again and it even began to rain. Large drops of rain fell onto the girl and before long, the old woman had muddy steps at her front door. She became angry, but the sky kept dropping rain and making more dust.
5. Finally the old woman was so angry that she grabbed her broom, stretched up high and whacked the sky with it over and over again. She asked of the sky to stop making mud around her clean house.
6. The sky didn't like being whacked with the broom or hearing the old woman's angry words. It flew up higher and higher until it was out of reach. The sky promised never to come close to the land again.
7. To this day the sky has kept its promise. It is so high, out of reach (or beyond).

RIC Publications - www.ricpublications.com.au The Comprehension Box - Scarlet 1 - Year 3/4/5/6/7/8/9/10/11/12/13/14/15

Teachers guide

Pupil recording sheet (see page 16)

Pupils record:

- their name
- the card colour
- the card number
- and write the appropriate answer (A, B) or (i) for each question. Both the short and full answers are provided on the answer cards.

Pupils indicate in the right-hand column, using a circle or a tick, whether the answer is correct or incorrect.

At the bottom of the recording sheet, pupils write the number of correct answers they scored.

Teachers may photocopy a number of recording pages and staple them together to form a pad. This information can then be used to complete the teacher tracking sheets.

Pupil tracking sheet (see page 17)

The pupil tracking sheet allows the pupil to monitor their own progress through the cards in the box.

Pupils record each card as it is completed. Generally speaking, it will not be practicable to complete the cards in the exact order. In this case, pupils should colour or tick the card completed and go forwards or backwards to the next available card.

RIC Publications - www.ricpublications.com.au The Comprehension Box - Scarlet 1 - Year 3/4/5/6/7/8/9/10/11/12/13/14/15

REVIEW 'We have purchased all the boxes to use as part of our guided reading sessions. The children love the variety of texts and the multiple-choice questions!'

Comprehension through cloze

Develop comprehension skills through imagination and illustration

» Six-workbook series

» Suitable for Years 1–6

» Covers the nine comprehension strategies

Can't get enough of *Teaching comprehension strategies*? Then you'll love our latest release! *Comprehension through cloze* aims to develop students' comprehension using high-interest, engaging and challenging activities. Each unit develops comprehension through three approaches: a reading passage with incomplete illustration, a cloze passage based on the illustration, and two focus pages on a specific comprehension strategy.

Sample pages from Book 2

Picture Morning chores

Visiting her grandparents' farm was Molly's favourite thing to do in the school holidays. There were so many chores she could help with each morning as the sun was coming up. Since the sow had her two piglets she was always hungry, so Molly would throw her kitchen scraps from the night before from the scrap bucket. Next, she would feed the baby lambs with a bottle of special milk her grandfather had prepared. After that, she would fill the large water bucket by the fence for the animals to drink, from. Molly was a little afraid of the two geese as they were very watchful of their four baby goslings and she knew they could bite, hard! The hen and her five chicks were the last to be fed with the chicken feed kept by the henhouse.

Cloze Morning chores

Visiting her grandparents' _____ was Molly's favourite thing to do in the school _____. There were so many chores she could help with each _____ as the sun was coming up. Since the sow had her two _____ hungry, so Molly would throw her kitchen scraps from the _____ bucket. Next, she would _____ with a bottle of special _____ her grandfather had prepared. After that, she would _____ bucket by the fence for the _____ drink from. Molly was a little _____ were very watchful of their four baby goslings and _____ hard! The hen and her five chicks were the last to be kept by the _____.

Making connections Morning chores – 1

Text to self

- Molly has a lot of chores to do on the farm.
Write or draw about a time you have done chores.
- Molly is afraid of the geese on the farm.
Draw a picture of an animal you have felt afraid of in the past.

Making summaries Morning chores – 2

Text to text

- Does this text make you think of a nursery rhyme? Write the name of it.
- Does this text make you think of another story? Write a sentence to explain what the story is about.

Text to world

- How is this story the same as something that is in the real world? Write a sentence.
- Do you think that all children have chores to do?
Yes No
Explain your answer.
- List three chores that children might help with. They could be inside the home or in the garden.

Benefits

- Activities encourage greater sensitivity to detail as students must identify missing details in illustration and text
- Students are kept engaged and enthralled with original stories from a variety of genres and high-interest activities
- Assists to extend vocabulary by encouraging students to choose new and different words to complete a story

Sample pages from Book 4

Pictorial **The birthday party**

Tessa was hosting her birthday party at home. Her parents had helped her to make bunches of balloons and curly streamers for decorations. The decorations, adhered by sticking plaster, hung from the ceiling and the walls around the dining room. The room's large table was set with birthday gifts and treats. On it were Tessa's two-tier birthday cake with layers of coloured icing; party foods, like chips and sandwiches and lollies, and a jug of punch. The punch was fizzy pink lemonade with pieces of fruit. Some gifts were easy to guess, like the hockey stick, but others, in bright-coloured wrapping paper, were not. Tessa started the party formally. She had practised how to do it before anyone had arrived. She faced her friends and thanked them for coming and for their gifts. Then she suggested games that she had ready. She liked games with uncertainty in their play. 'Pass the parcel' was one. The waggled parcel for it was on the floor next to her. 'Blind man's bluff' was another of her favourites. Then, there could be 'Pin the tail on the donkey'. Everyone began to talk at once.

Cloze **The birthday party**

Tessa was hosting her birthday at home. Her parents had helped to make bunches of balloons and streamers for decorations. The decorations, adhered by sticking plaster, hung from the and the walls around the dining room. The room's large table set with birthday gifts and treats. On it were Tessa's two-tier cake with layers of coloured icing; party sandwiches and lollies, and a jug of punch. The punch was pieces of fruit. Some gifts were easy to like; but others, in bright-coloured wrapping paper, were not She had practised how to do it before anyone had arrived. She faced friends and thanked Then she suggested games that had with uncertainty in their play. 'Pass the parcel' for it was on the floor next to another of her favourites. Then, there could be 'Pin the donkey'. Everyone to talk at once.

Predicting **The birthday party - 1**

Before reading

1. Read the title then look at the picture. Using these clues, write one or two sentences to tell what you think the text will be about.
2. What do you already know about the topic? Write some sentences. You may write about things you think you will see and things the children will do.
3. Write a list of topic words or phrases you would expect to see in the text. Write as many as you can.

Predicting **The birthday party - 2**

During reading

5. Read the beginning of each sentence from the text. Do not read on. Write how you think the sentence ends.

Her parents had helped her to make...	
The room's large table was set with birthday gifts and treats. On it were...	
Tessa started the party formally. She had practised how to do it before everyone had arrived. She faced her friends and...	

After reading

6. This sentence ends the text: Everyone began to talk at once. Draw a picture to tell what you think happens next.

Teaching comprehension strategies

Use the metacognitive approach to teach comprehension

- » Seven-book series
- » Suitable for Foundation to Year 6
- » Includes background notes and information for each strategy

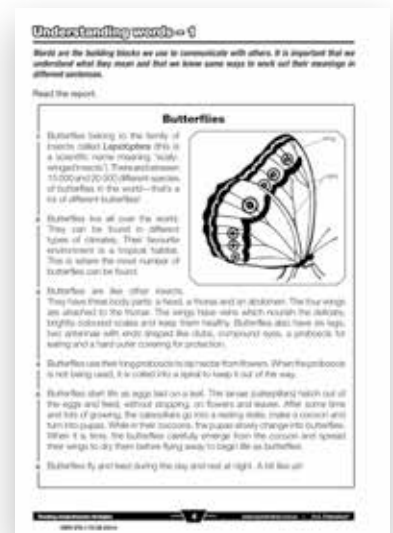

Teaching comprehension strategies is designed to methodically and creatively teach students the skills and strategies needed for effective comprehension. These strategies have been defined as understanding words, finding information, identifying the main idea, sequencing, comparing, predicting, concluding, summarising, inferring, cause and effect, fact or opinion, and point of view.

Features

- Original and varied texts, customised to suit the strategy being highlighted
- Skills and strategies taught using explicitly modelled examples and activities
- Assessment activities where students can apply the comprehension strategies that have been taught to answer problems

Reading and comprehending using text types

Prime-time comprehension is a three-book series that includes original and varied texts. Each book includes 20 texts, paired with a four-page unit of activity.

Features

- Variety of fiction, non-fiction, comic strips and poetry texts
- Texts within each genre are sequenced based on degree of difficulty, with questions organised in three levels
- Each four-page unit includes: the illustrated text, a page with five literal and five inferential-type questions, a page with five evaluative-type questions and a page with an activity to expand on the text topic

Cloze

	AGES	CODE	PRICE
Lower	5-7	0108	\$27.95
Middle	8-10	0109	\$27.95
Upper	11+	0110	\$27.95

Comprehension with pictorial and context clues

Cloze is a well-known teaching strategy for developing language skills. Engage students with cloze exercises that are varied and interesting.

Features

- Two main types of cloze: one where words are provided and one where students choose their own
- Reading strategies include context clues, syntactic and semantic skills, and word recognition
- Imaginative passages help expand vocabulary and promote written expression

TEACHING TIPS

» Always use a plenary activity at the end, or towards the end of a lesson to consolidate learning. Try the following:

- In pairs, students tell each other three things they learned, then tell the class what their partner learnt.
- Snowballs—Students write what they learned on a piece of paper, scrunch it up, then throw their snowballs into the air. Another student picks up a snowball and reads it aloud.
- Gallery walk—Groups of students write and draw what they learned on a sheet of paper. These are displayed for all to see.

Take a unique approach to comprehension

An excellent resource to practise deductive reasoning by getting students to solve mysteries through reading and accurately comprehending the text.

Features

- Unique high-interest mysteries that promote logical and creative thinking
- Combines comprehension and problem-solving to promote logical and creative thinking
- Encourages data collection skills and the drawing of conclusions

A world of words

Help your students build their vocabulary

Help students learn about different kinds of words and extend their vocabulary! Written to support Australian Curriculum English, this series teaches through real-life, everyday subjects designed to interest and engage.

Features

- Linked to the Australian Curriculum English learning area and covers content descriptions from the Language strand
- Lesson plans include whole-group instruction and small-group or partner work, followed by an individual student activity
- Comprehensive assessment tools—including independent revision activities, self-assessment sheets and teacher assessment checklists

Writing prompts

For a free sample, go to:
www.ricpublications.com.au/writingpromptssample/

- » Three-box series
- » Suitable for Years 1 to 6
- » Express creativity through a variety of writing styles

Inspire your students to write!

Are you ready to help your students write their next masterpiece? This three-box series features engaging cards that contain prompts for imaginative, informative and persuasive writing, encouraging students to express their creativity while learning how to write using a variety of styles. Suitable for ages 5 to 11+, each box contains 200 durable, colourful writing cards.

Benefits

- Provides opportunities to engage the class with discussion on how to write a story based on the prompt. Use questions like: How should we start? Who are the characters going to be?
- Can be used to model different text types, such as a narrative, recount or persuasive text, or to write a poem.
- Provides opportunity for extension by asking students to share their writing in small groups, or by asking them to take turns in writing paragraphs to form a story.

Improve writing at sentence level!

- » Six-book series
- » Suitable for Years 1 to 6

- » Covers word choices, sentence structure, punctuation and editing/proofreading

A simple change in text can create a difference in meaning. When teaching students to write well we need to emphasise the importance of correct grammar, punctuation, spelling and structure. This six-book series will direct students to produce clear, precise, purposeful writing. By applying these strategies, students will understand that editing and proofreading are integral parts of the writing process.

Features

- Each book is divided into four sections covering the basics of good writing
- Worksheets can be completed independently or in groups/with the teacher, allowing for levels of differentiation
- Each unit has a page of assessment activities giving teachers a record of individual understanding and achievement, and highlighting common points of weakness

**Exploring text types**

The *Writing topics* series gives students the opportunity to understand the six types of writing: report, narrative, procedure, explanation, exposition and recount. This will then be applied to topics across six themes.

Features

- All writing genres thoroughly explained through definitions, text structure and special language features
- Checklist-based content with procedures helpful for assisting students to work independently
- Blank proforma for students to give various options before being analysed and assessed

Another 60 writing topics

AGES	CODE	PRICE
5-7	6237	\$34.95
8-10	6238	\$34.95
11+	6239	\$34.95

**Exploring more text types**

These writing topics will give students further opportunities to learn about seven writing forms: report, narrative, recount, procedure, exposition, discussion and explanation.

Features

- Thorough explanations of each writing genre, including; text structures and definitions
- Portfolio-based content with reference to curriculum and ways to expand students' knowledge
- Checklists incorporated as part of procedural learning

TEACHING TIPS

- » When teaching literacy skills and text structures, don't forget the often-neglected form of poetry. Like any form of literature, poetry is a valuable resource through which teachers can impart reading, spelling, writing, punctuation and grammar skills. Poetry allows students to share their feelings, understand texts and develop a love of literature. It can be very creative while following structures such as haiku, cinquain, rhyming pairs, limericks and riddles. Poetry encourages students to develop higher-order thinking skills to express ideas, feelings and thoughts, so why not use a variety of poetry—you'll be surprised at the results!

AGES	CODE	PRICE
7-8	6274	\$42.95
9-10	6275	\$42.95
11+	6276	\$42.95

**Reading, writing, speaking and listening**

Investigating poetry helps students learn about comprehension, discussion, creative writing, word study and interpreting texts.

Features

- Worksheets that assist students to read, write, speak and listen to poetry
- Practical activities that follow structured lessons and incorporate self-assessment
- Teachers notes which provide background information before going in-depth on topics

Text types posters series

Stimulate classroom discussion

- » Essential classroom posters
- » Suitable for all ages
- » Cover key aspects of writing at a glance

Large colourful posters offer students immediate guidance on major text types. Display them around the classroom to encourage learning and allow for major student personal skill development. They include illustrative guidelines and demonstrations on how students can improve their skills.

Features

- Illustrated guidelines for students to follow when undertaking tasks with relation to each specific text type
- Content features a definition, an explanation on when and how to use each writing genre, and clear annotated examples
- Covers the major six types of text—explanation, procedure, exposition, recount, narrative and report—with in-depth information shown on posters for each of these text types

New wave handwriting

Revise and consolidate every day

New wave handwriting provides teachers with a systematic approach to the instruction and practice of handwriting. It has been written in the belief that it is essential for all children to develop fluent, legible and attractive handwriting.

Features

- A developmental approach to handwriting with extensive regular revision and consolidation
- Introduction to correct formation of lower- and upper-case letters, numbers and number words
- Regular assessment opportunities for the teacher
- Three-workbook series
- Suitable for Foundation to Year 2
- Available in three fonts

New wave pre-writing patterns

Preparing children for letter formation

Written by Diana Rigg and a team of occupational therapists, *New wave pre-writing patterns* workbook presents a systematic and fun approach for teaching the foundation skills that are essential for children to learn the pre-writing patterns used to make pictures and then combined to make letters and numbers.

Features

- Students learn patterns at a gross level before looking at fine motor skills of handwriting
- A systematic and procedural approach to learning fundamental skills for young students grasping new concepts of writing
- Incorporates pre-writing patterns to introduce students to creating pictures to then integrate into letters and numbers

The Spelling box

Boost your spelling scheme!

» Six-box series

» Suitable for Years 1 to 6

» Use with ANY spelling scheme

Support your spelling program with *The Spelling box*! Each box contains 100 original cards (two copies of each) of fun-filled spelling activities, anchored in nine well-researched skills and strategies—using phonemes, visualising, chunking, using analogy, using rules and generalisations, applying morphemic principles, using mnemonics, using etymology and using sources. Each box has a variety of downloadable resource sheets to support selected cards.

Sample cards from Box 1

1 Using Phonemes

Say and clap each spelling word.
Copy each word with one syllable.
Draw a line to make the onset and rime.
For example, m/um, d/og, h/at.

THE SPELLING BOX 1

6 Visualising

Join cubes together as you say each letter in each spelling word.
How many letters in each word?
For example,

Repeat for the sounds in each word. Are they the same or different?

THE SPELLING BOX 1

Sample cards from Box 4

3 Using Analogy

Learning to spell a prefix and knowing its meaning helps you to spell and understand other words.
Write the words 'autograph' and 'automatic'.
Underline the prefix. What do you think it means?
The word 'autobiography' has three morphemes. They can all be used as prefixes in other words.
Write auto-, bio- and -graph. Use a dictionary to find their meanings and work out what you think 'autobiography' means.

THE SPELLING BOX 4

9 Applying Morphemic Principles

Select a base morpheme from one of your spelling words. Use a dictionary to find other words with that morpheme.
For example,

THE SPELLING BOX 4

The Spelling box

50 spelling activities

Give students the opportunity to practise spelling

50 spelling activities allows teachers to incorporate spelling-based content into the classroom in an activity style. This gives students the ability to practise words, look at them and utilise them.

Benefits

- The systematic approach of the activities mean teachers can isolate areas for improvement and facilitate those lessons.
- 'Have-a-go' activities encourage students to attempt unfamiliar words as part of the learning process.
- Activities can be copied and laminated to be used for specific purposes.

Blends	5-7	0387	\$34.95
Vowel Sounds	5-7	0128	\$34.95

Active phonics

Introduce initial blends and digraphs

Active phonics is a series of three teacher resource books that will require students to use visual and auditory discrimination skills with pictures and words to identify each phonic sound being treated.

Benefits

- Inject some fun into your lessons with phonic-based colouring, circling/matching activities that focus on a single consonant sound, blend or digraph.
- Challenge your students to copy each single consonant sound, blend or digraph with school script.
- Extend your lessons further by adding your own words to the given list of final sounds.

	AGES	CODE	PRICE
Book 1	9-12	2072	\$34.95

Phonics in context

	AGES	CODE	PRICE
Book A	5-7	0647	\$39.95
Book B	5-7	0648	\$39.95

A fun approach to consolidating common sounds

Phonics in context provides opportunities to expand students' sight and phonic vocabularies in the context of a story. The books contain a selection of stories, with each one concentrating on a particular sound group. The content of each story and accompanying artwork add a humorous element, appealing to both students and teachers.

Benefits

- Get students' attention with a selection of stories, each concentrating on a particular phonic sound group.
- Help your students consolidate and expand their phonic and sight vocabularies.
- Comprehensive activities accompanying each story include word recognition, spelling, comprehension and word study.

Reading with phonics

	AGES	CODE	PRICE
Book 1	5-7	6308	\$42.95
Book 2	5-7	6309	\$42.95
Book 3	5-7	6310	\$42.95

Teach phonics in context

Present a focus sound(s) in the context of a narrative, rather than in isolation, and help students practise identifying and using the sound(s) while reading and comprehending.

Features

- Worksheets to reinforce students' phonemic awareness and consolidate the learning of phonic sounds
- Differentiation opportunities with texts and worksheets of varying degrees of difficulty
- Easy-to-follow format both students and teachers will enjoy

Enjoying the library

Library skills activities

Enjoying the library is a seven-book series that provides a thorough library program. With a focus on 'hands-on' experiences, this series gives students the opportunity to explore the resources available in the library.

Features

- Flexible to use, will suit any library, regardless of the number of resources available for the students
- Progressively teaches students to become independent library users, and will work with students of varying abilities
- Designed to be used by both classroom teachers and library specialists

	AGES	CODE	PRICE

Provide early childhood students with practise sequencing visual texts

Sequencing visual texts is a series of three teacher resource books to support the teaching and learning of sequencing in early childhood classes. This series can help students who are struggling with written texts.

Features

- Background information, suggestions for additional activities, and pictorial and text resources
- Activities listed include popular themes such as animals, plants, people, weather and much more
- Linked to the Early Years Learning Framework and Australian Curriculum English

The jungle bully

LEVEL	AGES	CODE	PRICE
Foundation – Year 3	3–8	6897	\$29.95

Address bullying with this beautifully illustrated big book

A small monkey is bullied by other monkeys in his community and, feeling sad, runs away to be by himself. Follow the monkey's journey to deal with bullying, and help your students reflect and prepare to deal with a similar situation. Textless big books are a wonderful way to build oral language skills and provide an easy transition into more formalised reading.

Integrated oral language

New wave literacy secondary

Develop literacy skills and processes in secondary students

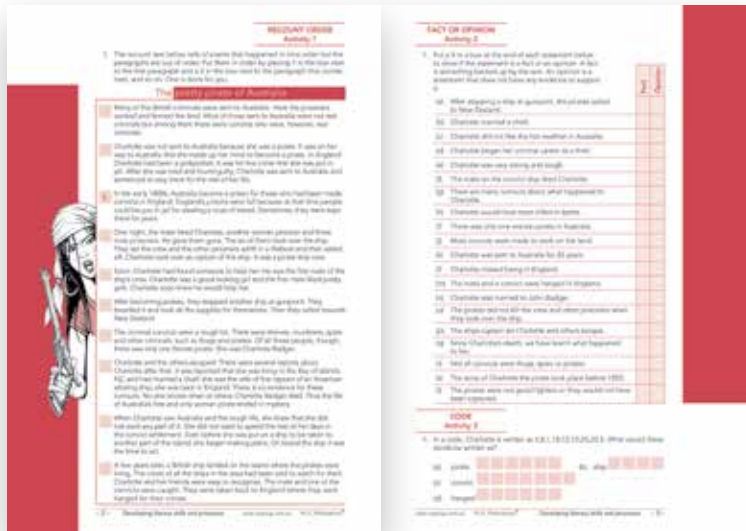

- » Three-book series
- » Suitable for Years 7 to 9
- » Provides literacy skills support for secondary students

This series is full of fun activities written especially to help students practise their literacy skills. Packed full of interesting information, it'll help engage students in their literacy achievement progress. The program is focused on upper-level thinking skills that underpin literacy competence.

Features

- Each book is based on a modern text approach to reading and writing, with content themes that are relevant to students of each year level
- The process themes provide a developmental, sequential coverage of major literacy skills
- Organised into easily managed modules built around a theme, which are great for group work or independent students

Maths

Keeping it relevant for the modern classroom

What's the biggest challenge in teaching mathematics? Making sure that students are interested and engaged, so that they understand how important maths is in understanding their everyday life. That is the aim of our maths resources, whether it's our bestselling student workbook, *New wave mental maths*, our curriculum-aligned teacher resource books, or our engaging boxed sets.

With the varying pace that students grasp mathematics, we are focused on creating resources that will meet a wide range of needs, providing flexibility for every teacher to utilise the resources in their classroom. The aim of our resources is to give context around each mathematical skill, allowing students the opportunity to deepen their understanding. With students engaged, their interest and confidence will soar, resulting in a successful maths program.

The Maths box

For a free sample, go to:
www.ricpublications.com.au/mathsboxsample/

Each box includes a Teachers Guide.

REVIEW 'The Maths box encourages resilience, independence and confidence in maths learning. We have used the resource in a variety of ways, as part of a targeted intervention, independent extension, consolidating activity or short assessment.'

Jane Hainsworth, Teacher

Motivate your students with fun, creative and challenging activities! *The Maths box* provides practice and consolidation of skills already taught in the classroom, with opportunities to extend students further. Designed to be flexible, this resource allows for independent, small-group and whole-class maths activities. This gives teachers freedom to roam the classroom and provide more tailored teaching for individual students.

Benefits

- Use anytime to reinforce maths concepts and support your maths program. The box covers all three strands of mathematics, supported with scope and sequence charts to map your coverage.
- Allows for independent learning—it can be tailored for individual students' learning goals, strengths and weaknesses.
- Designed to provide intellectual engagement and connect learners to the wider world.

Australian Curriculum Mathematics – Measurement and Geometry

Help your students discover the shapes and structures of the world

- » Seven-book series
- » Suitable for Foundation to Year 6
- » Fully linked to Australian Curriculum Mathematics

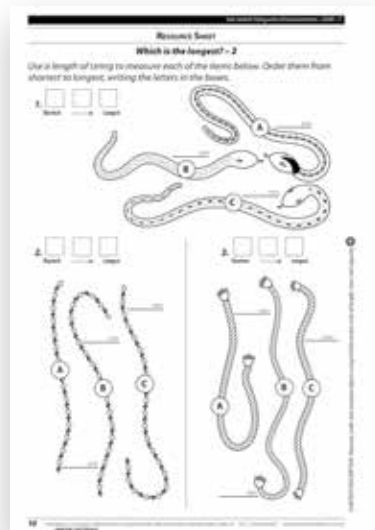

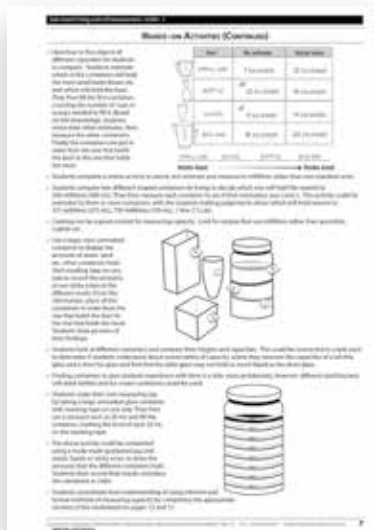

Watch students' knowledge and curiosity grow as they learn through the interesting, fun-filled questions and activities in this series. Written by mathematics educator Linda Marshall, for the Measurement and Geometry strand of Australian Curriculum Mathematics, this resource will have students shapeshifting into mathematics superstars in no time!

Features

- Strong teacher support with extensive teachers notes, related terms, content description explanations and much more
- Concepts are taught through the proficiency strands of Understanding, Fluency, Problem solving and Reasoning
- Wide variety of hands-on maths activities

Sample pages from Book C

Australian Curriculum Mathematics – Statistics and Probability

Have fun discovering the world of statistics and probability

Written by Clare Way, this collection of fun and relatable questions, activities and scenarios will immerse students in the world of statistics and probability, giving them an appetite for more.

Features

- Focuses on the Statistics and Probability strand of Australian Curriculum Mathematics
- Extensive support with theoretical background information and teacher information
- Plenty of hands-on and assessment activities, with answers provided

	AGES	CODE	PRICE
Book 1	5–8	6112	\$39.95
Book 2	8–10	6113	\$39.95
Book 3	10–11+	6114	\$39.95

Australian Curriculum Mathematics – Fractions

How do we apply fractions and decimals in everyday life?

'This morning I ate a whole piece of toast!', 'I can swim half the length of a swimming pool!' Without realising it, children are constantly boasting through fractions; they are an integral part of life! Help your students learn about fractions and decimals, and how they are applied in everyday life.

Features

- Covers all aspects of fraction work, including decimals and percentages for the upper levels
- Concepts are taught through the proficiency strands of Understanding, Fluency, Problem-solving and Reasoning
- A large variety of hands-on warm-up activities linked to the Australian Curriculum

	AGES	CODE	PRICE
Book 1	6–8	6136	\$34.95

Book 3	10–11+	6138	\$39.95

Australian Curriculum Mathematics – Money

Make your students masters of money

Through the use of real scenarios and everyday activities that they are likely to encounter, students will learn about Australian and foreign currency in fun and engaging ways.

Features

- Designed to immerse your students into a subject which is both important and globally relevant
- Concepts taught through the proficiency strands of Understanding, Fluency, Problem solving and Reasoning
- Each money-related Australian Curriculum outcome is covered in detail through a variety of activities

Primary mathematics

Fulfill all your mathematical needs

- » Seven-book series
- » Suitable for Foundation to Year 6
- » Deliver a maths program for your year level

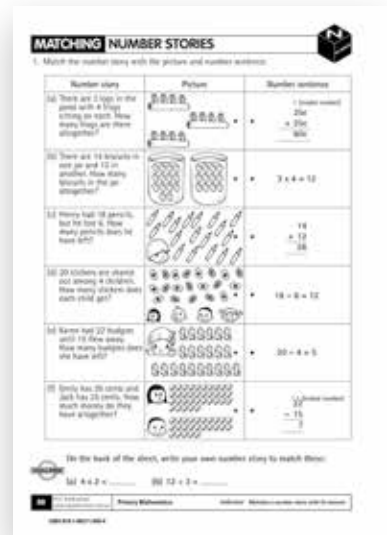

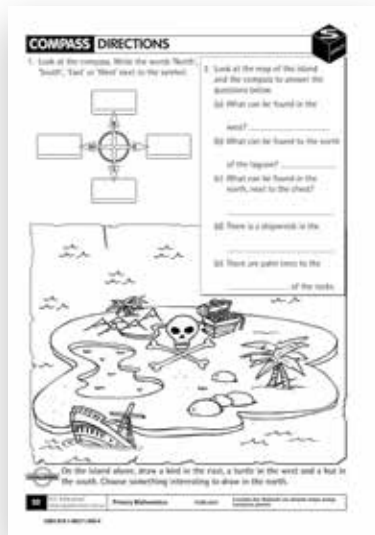

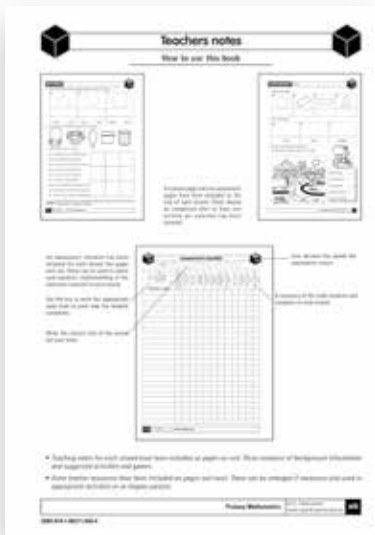

Students will love learning with this series! All your mathematical needs are covered with over 150 activity pages, as well as introductory activity suggestions for each resource. Packed with fun and informative questions and games, as well as quirky character illustrations, *Primary mathematics* is a winner.

Features

- Comprehensive teachers notes for each individual strand, listing required materials, activities and games
- Covers the traditional curriculum strands of number (including patterns and algebra for NSW) measurement, space, and chance and data
- Revision and assessment pages for each strand, ideal for inclusion in student portfolios and for reporting purposes

Sample pages from Book C

Problem-solving strategies and skills boxes

For a free sample, go to:
www.ricpublications.com.au/problemsolvingboxsample/

Easily bring problem-solving into your daily lessons

» Three boxes for each year level, split by mathematical strand

» Suitable for Foundation to Year 6
 » 30 unique cards in each box

Embed mathematical problem-solving and reasoning in your lessons with the *Problem-solving strategies and skills* maths cards!

These beautifully illustrated cards provide a wide variety of motivating and high-interest problem-solving activities. The problems involve one or several steps, requiring the use of a variety of strategies and skills to solve.

Features

- Each box covers a mathematical strand: Number and Algebra, Measurement and Geometry, and Statistics and Chance, with 30 unique cards in each box
- Strategy icons marked on each card encourage students to select the most effective strategy to solve the problem
- A variety of differentiated problems including word, logic, and visual real-life scenarios

New wave mental maths

Give students the best opportunity to succeed in maths

- » Seven-workbook series
- » Suitable for Years 1 to 6
- » 200 days worth of maths problems in each book

NEW

Save even more time with the *New wave mental maths* online portal for teachers. Quickly correct answers, elevate the Friday assessment, and review concepts while staying engaged within the program—we have taken all of your suggestions and more.

With over 20 years of research and continuous development, our bestselling series is still the best mathematics practice resource for the modern classroom. Visually rich and engaging, *New wave mental maths* provides daily practice to increase students' fluency and automaticity in all three maths strands. Have a closer look at these workbooks and find out how they can make a difference in your school today!

Features

- Daily practice of mathematics with a spiral learning method to consolidate and improve students' skill levels—200 days worth of maths problems in each book
- Problem-solving questions each week, designed to develop students' ability to make choices, interpret, formulate, and communicate solutions effectively

TEACHING TIPS

» In my teaching experience, I've found that maths skills are often taught and worked on once then forgotten, causing a tremendous strain on both teachers and students. This is why I've developed *New wave mental maths* – they provide a way to reinforce taught concepts through repeated practice and lift the students' overall maths results.

EDDY KRAJCAR
 Teacher & author

New wave Number and Algebra

Find fun in maths

Packed with activities that cover all curriculum sub-strands, *New wave Number and Algebra* makes learning and practising maths exciting, challenging and addictive!

Benefits

- Tests and extends mathematical knowledge.
- A fun way for students to quickly and easily consolidate their skills.
- Easily identifiable Australian Curriculum links on every page.

Starting point mathematics

Screen your students' maths capabilities quickly and efficiently

With *Starting point mathematics*, two of our leading mathematical educators, Dr Paul Swan and Linda Marshall, have designed a solution for you to find out your students' strengths and weaknesses in maths.

Benefits

- Gives teachers a way of quickly gauging the level of the class and each individual student.
- Can be paired with the teachers guide to explain the purpose of various test items.
- Can be used flexibly, either start of the year, end of the year, or once a concept has been taught.

Times table challenge

AGES	CODE	PRICE
9+	0077	\$34.95

Three-minute tasks from easy to extreme!

Highly motivational and fun. Instead of doing repetitive chants and playing games in class, engage and challenge the whole class with *Times table challenge*!

Benefits

- Can be readily incorporated into your weekly program.
- Requires very little preparation to get started.
- Contains double copies of same-focus pages to save photocopying.

Mastering tables

AGES	CODE	PRICE
8+	0572	\$34.95

Improve students' times tables

Give students a variety of challenging activities to assist their learning of multiplication skills.

Benefits

- Encourages mental calculations through self-assessment reviews.
- Assists students through tutorial work to illustrate justification for multiplication work.
- Saves time and stress with provided answers, as well as outcome links to more information and examples.

Step into tables

AGES	CODE	PRICE
8-11+	0612	\$29.95

Progress students' tables ability

A learning package which progresses in difficulty to provide students challenges in tables learning.

Features

- Divided into three key sections that allow specific learning
- Procedural-based learning allowing students to self-analyse
- Basic learning patterns for student to remember, plus flash cards

Maths speed tests

	AGES	CODE	PRICE
Book 1	9-13	0078	\$34.95
Book 2	8-14	0079	\$34.95

Improve calculation skills

Maths speed tests provides students with opportunities to improve their rapid calculation skills with essential addition and subtraction facts.

Features

- Self-completion aspect, encouraging students to enjoy the activities while reinforcing the knowledge of essential facts
- Additional material on most pages for fast finishers
- 10 sheets can be used to make a student's booklet for a term and a blank speed test has been included for the teacher to create their own, depending on students' needs

Maths word puzzles

Provide fun maths word search puzzles

Maths word puzzles offers students an entertaining and educational way to review their mathematical skills. The book offers a range of mathematical terms and puzzles from multiple curriculum strands.

Benefits

- Heavy incorporation of mathematical strands—Number and Algebra, Measurement and Geometry, and Statistics and Probability.
- Can be utilised as a revision product for students as well as offering a task for early finishers.
- Provides an alternative to traditional review techniques and can be used as a homework or revision tool.

Motivate students through maths games

Maths games provides teachers with game boards that assist students' learning of mathematical concepts and language.

Benefits

- Emphasises mathematical language to introduce, reinforce and consolidate concepts.
- Encourages cooperative learning through the group board game options.
- Blank game boards allow teachers to customise their own games to suit their students.

LEVEL	AGES	CODE	PRICE
Year 3-6	8-11+	P7092	\$49.95

Laminated posters for collaborative maths games

The posters are designed to give students a diverse range of maths games across multiple concepts.

Benefits

- Fosters greater learning through games linked to the Australian Curriculum.
- Provides a fun avenue to learn about mathematical language through solving word problems across all four operations.
- Incorporates group learning and collaborative work.

Maths games for the Australian Curriculum

	AGES	CODE	PRICE
Book 1	6-8	6119	\$39.95
Book 2	7-9	6120	\$39.95
Book 3	8-10	6121	\$39.95

Improve maths skills through collaborative games

Maths games for the Australian Curriculum incorporates Australian Curriculum learning pathways into an interactive and collaborative book.

Features

- 12 games that assist students in learning core maths concepts
- Covers concepts of fractions, numbers and algebraic thinking
- Instructions explain each game and the relevant teachings that come from it

TEACHING TIPS

- » Instead of asking closed questions such as what is 4 and 3, why not ask what two numbers add to seven.
- » You will learn a lot more about what your students know. Answers will include 4 and 3, or 3 and 4, 5 and 2 and so on, but might also include $5\frac{1}{2}$ and $1\frac{1}{2}$, 1.5 and 5.5, 10 and -3, and so on.
- » Opening up the question helps with both differentiation and assessment.

DR PAUL SWAN
Author

Early skills series

Develop early reading, writing and numeracy skills

- » Suitable for ages 4 to 6
- » Cover seven key skills through seven books
- » Prepare early childhood students for maths

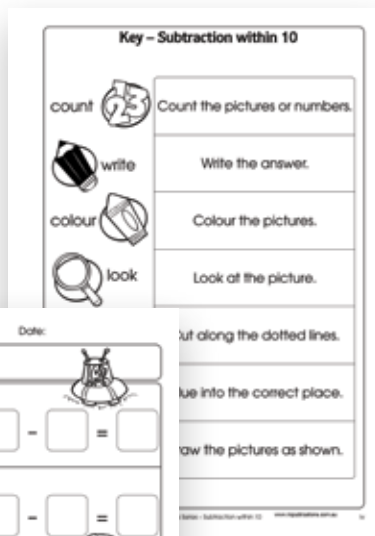

The Early skills series of books is designed to provide practice in a range of early reading, writing and numeracy activities as well as develop perceptual and fine motor skills in the early years. Motivate children to work independently, increase their attention span and develop their abilities.

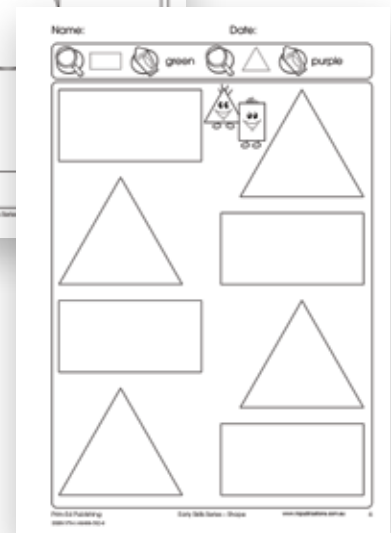

Benefits

- Designed for the little ones—get them interested with bold, uncluttered and visually appealing worksheets. Instructions are provided in graphic form, making it even easier for kids to work independently.
- Books can be used flexibly by teachers—teach a new skill or reinforce and consolidate those already taught. Areas covered are key skills for early childhood.
- Aids in developing perceptual and fine motor skills in the early years, preparing students for future success in literacy and numeracy.

Provide regular mathematical practice for your classroom

Tune your students' minds into mathematical ways of thinking by creating a useful routine! This resource provides students with a quick maths basic facts test every day.

Features

- Covers the basic facts of adding, subtracting, multiplying and dividing
- Clear and easy-to-follow format, allowing students to jump right in
- Answer key available on request

Maths terms and tables

LEVEL	AGES	CODE	PRICE
Years 3-6	8+	1069	\$19.95

Simple descriptions of terms: clear tables, charts and diagrams

Written by leading mathematical educators, Dr Paul Swan, Linda Marshall and Jack Bana, this essential reference book is crucial to help parents, teachers and students understand maths terms better.

Features

- A comprehensive listing of common mathematical terms, tables and concepts with brief yet accurate definitions
- Definitions written in unambiguous, easily-understood language, preventing confusion
- A key reference and highly-accessible resource for users at all levels—students, teachers and parents

Science

Reach for the stars through science

Our planet is astonishingly complex and contains a plethora of natural and constructed features, from amazing life cycles and evolutionary adaptations of different species, to human inventions which have changed the way we live. Engaging children with science couldn't be more important and, with a smorgasbord of examples, our science resources are a must-have for teachers.

Preparing students for the future, each captivating resource will give them a thirst for scientific knowledge and understanding through hands-on and interactive activities. Our resources nurture children's curiosity and help them develop the skills they need to answer their questions, allowing for deeper learning opportunities. Engaging activities and easy-to-use lesson plans enable teachers to integrate science into their curriculum with ease, providing the content necessary to satisfy students' science education needs.

STEM projects + STEM kit

Help your students become innovative, communicative, collaborative and thoughtful problem-solvers

» Seven-box series

» Suitable for Foundation to Year 6

» 28 unique projects in each box

The *STEM projects* series provides opportunities for students to develop skills and knowledge in science, design and technology, and mathematics, as well as general capabilities, while completing short- or long-term projects. It encourages students to follow a consistent design process while completing the projects, including finding out information, planning and designing, creating, evaluating and communicating.

Sample of the Teacher reference card

Physical sciences

Teacher reference

What are Physical sciences?
Physical science, or more specifically Physics, is the study of matter and its motion through space and time. It includes concepts such as types of motion, energy and force.

Students will apply their knowledge of:

- how different objects move, and
- how an object's size and shape affects the speed, distance or duration it moves.

Students will learn to use their:

- science inquiry skills while planning and conducting experiment-based projects, such as how far, how fast and for how long an object moves, and while researching and applying information to their project.
- design and engineering skills while creating ramps, rick, top-fins and toys.
- digital technology skills while taking digital photographs, filming videos and using a computer to research online information.
- mathematics skills to measure, count objects and record time.

Sample of the Design progress card

Design process

1. Find out information

- Read fiction and non-fiction books.
- Use a computer or tablet to search videos and look at pictures.
- Talk to people that can share information with you.
- Visit places that may help you learn more.

2. Plan

- Think about what you will make and how you will make it.
- Talk to your group members and share your ideas.
- Draw a picture of what you will make.
- Write the main parts of your design in your picture.

3. Materials

- Choose which materials you will need for each part.
- Find where the materials are kept.
- Collect the materials you will need.
- Check that you have the right materials.

Sample cards from Foundation

Physical sciences **Project 1**

Spinning top

Design and create a spinning top using craft materials.

CRITERIA:

- It must spin for 10 seconds. Count to 10 slowly to test it.
- It must be a circle shape.
- It must be coloured in a two- or three-colour pattern.

SUGGESTED MATERIALS:

- cereal box
- paper
- a matchstick or pencil
- circle stencil or plastic cup
- plastic modelling clay or playdough

Physical sciences **Project 1**

Spinning top

- Find out how to make a spinning top using craft materials.
- Plan and draw a diagram of your spinning top. Label the materials you will use to make each part.
- Collect the materials you will need, including a cereal box, paper, a matchstick or pencil, a circle stencil or plastic cup, and plastic modelling clay or playdough.
- Create your spinning top to look like your plan.
- Check that your spinning top meets the criteria.
- Give a presentation explaining how you made your spinning top and showing your spinning top in action.

STEM projects + STEM kit

ALSO AVAILABLE
 STEM projects box with
 resource kits

Benefits

- The projects allow students to work in small teams, using effective communication and collaboration skills, to plan, design, create and evaluate a thoughtful and innovative solution to a given task.
- When satisfied with their solutions, students are able to showcase and discuss their design, explaining how science was used throughout the project.
- The cards are designed to provide little interference to the students' creativity, allowing them to create their own paths.

 STEM projects
 Box 6 + kit

Sample cards from Box 4

REVIEW *The layout of the cards was easy to follow. The tasks were fun and the students enjoyed the experience of using them. The resources needed for the tasks were affordable and easy to find around school so there was no additional cost which makes a difference when starting something new.*

M. McMahon, Primary School Teacher

Science: A STEM approach

Prepare your students for the roles of the future

- » Seven-book series
- » Suitable for Foundation to Year 6
- » Fully linked to the Australian Curriculum

Minds will be challenged and imaginations unleashed as students develop skills such as innovation, creativity, reasoning and problem-solving; and technical science skills such as questioning, observing, systematic experimentation, and analysis and interpretation of data. Feel confident delivering a comprehensive and contemporary science program, and ease your way into STEM projects with *Science: A STEM approach*.

REVIEW 'Another excellent approach. The lesson plans are detailed and cover both skills and content aspects of the curriculum. Easy to integrate into our planning and made assessing the children's learning easier and much clearer.'

Alex Gilber, Teacher

Features

- Each book is split into four units, which are organised by sub-strand—Biological sciences, Chemical sciences, Earth and space sciences and Physical sciences
- Each unit is designed to be easy to follow for the teacher, with a term overview at the start of each unit and comprehensive background information
- A variety of fun and interesting projects each link the science knowledge and skills learnt with aspects of engineering, design and technology, information technology and mathematics

Australian Curriculum Science

Discover how science has changed the way we live

- » Eight-book series
- » Suitable for Foundation to Year 6
- » Fully linked to the Australian Curriculum

With a wide variety of examples, *Australian Curriculum Science* is the must-have one-stop resource for teachers. Through hands-on and interactive activities, each book in the series will captivate students and give them a thirst for scientific knowledge and understanding.

Features

- Easy-to-follow structure, with plenty of guidance for teachers to execute an engaging science lesson
- Revised edition includes Australian Curriculum links, fully mapped out for your coverage reference
- Each unit includes a science literary text to explain the concepts; comprehension questions to gauge understanding; and a hands-on activity to engage students

Primary science

Run a successful science program

Primary science gives students the opportunity to enhance their knowledge of the world around them and to engage in collaborative learning that makes science interesting and exciting.

Features

- Comprehensive teachers notes for each student activity
- Concepts, knowledge and skills sharing emphasised equally in each unit
- Topics covering the four main strands of science education

TEACHING TIPS

» Have you ever considered practising mindfulness in your classroom? Mindfulness is the practice of focusing one's awareness on the present moment, while calmly acknowledging and accepting one's feelings, thoughts and bodily sensations. Practicing mindfulness activities with your class can improve the mental health of students; reduce classroom disruptions; and provide emotional benefits for at-risk students, early childhood development, student engagement and childhood anxiety. Plus, teachers can join in and achieve Zen in their day.

HAYLEY MCDERMOTT
Teacher & author

Help students learn about the environment and their role in preserving it

With so much talk about the environment and climate change, it is important to include students in current discussions. Help them build their frame of reference with our wide range of environmental resources.

Benefits

- Teaches the science around the environment and climate change—essential in building your students’ motivations to live sustainably.
- Provides comprehensive and contemporary information summarising the main types of sustainable energies being developed and used today.
- Helps raise students’ awareness of Earth and the consequences of human activity.

HASS

The History box

Make history fun and boost students' inquiry skills

» Four-box series

» Suitable for Years 3 to 6

» Includes 18 topic introduction cards, 36 activity starter cards, 1 teacher resource book and 1 teachers guide

Help students peer inside the minds of people from Australia's history to see events of the past from different perspectives. Encourage students to communicate their enlightenment in ways that will bring the past to life, helping each other to see that what happened then has affected what happens now which will, in turn, affect events of the future ...

The History box – An inquiry approach is a resource to help you, the teacher, sweep away the cobwebs of antiquity and breathe life and energy into this fascinating learning area.

Australian Curriculum History

Take a trip through history and learn how the past has helped shape today's world

» Seven-book series

» Suitable for Foundation to Year 6

» Fully linked to the Australian Curriculum

This engaging, content-packed series covers the Historical Knowledge and Understanding strand for each year level. Students will be enthralled learning about the first circumnavigation of the globe, Australia's first people, migrants who have crossed the sea for a new life, and much more.

Benefits

- Covers all relevant curriculum content descriptions in the Historical Knowledge and Understanding strand for each year level.
- Provides students with the framework for investigating Australia's history through key inquiry questions.
- Enhances any school's history program, providing a springboard for further investigation into people and events of the past.

Years 1–6	6–12	6687	\$39.95

Honouring our heritage

Written to commemorate the centenary of WWI and the Anzacs in Gallipoli. Cover nine different Anzac Day topics and engage students with exciting activities.

Features

- Comprehensive information about why and how Anzac Day is observed and what it involves
- Details the Gallipoli campaign, fighting on the Western Front during World War I and more
- The latest information about Australia's defence forces, including uniforms and armaments

Australian Curriculum Global geography

Explore the world through an ICT and Inquiry lens

» Four-book series

» Suitable for Years 3 to 6

» Fun and interactive lessons

Take your students on an adventure around the world with *Australian Curriculum Global geography*. Through exploring the human and physical characteristics of places, students will investigate, create and communicate their understanding of the world around them.

Features

- Full-year program: 20 easy-to-follow lessons with an introduction activity, main development activity and a concluding activity
- Fully mapped to the HASS component of the Australian Curriculum
- Designed with an ICT and inquiry approach, develop your students' inquiry skills and engage them with fully interactive lessons with links to excellent resources

Develop process and production skills through hands-on activities

» Six-box series

» Suitable for ages 6–12

» Hands-on projects to engage students

Design and technologies: Project-based learning is a six-box series that offers opportunities to hone students' process and production skills while designing and creating interesting and fun projects. The flexibility of the four themes (Food and cooking, Clothing and textiles, Building and construction and Technological advancements) means that projects can be adapted where necessary. No matter which project your students are working on, they will be collaborating and communicating to find solutions to real-world problems.

Sample cards from Box 3

Features

- Contains a variety of real-life projects across the units of Food and cooking, Clothing and textiles, Building and construction and Technological advancements
- Fun projects include designing and creating jelly cups, fabric bunting, a 3D town map and a snowmobile model
- Teacher instruction/notes are included, along with a list of all projects covered in the box

Year 5 CLOTHING AND TEXTILES

Fashionable Earmuffs

Project task:
Design and create a set of fashionable earmuffs that children who live in cold climates would want to purchase and wear during winter.

Project ideas:

- Pom-pom style
- Wool sweater style
- Superhero-themed
- Hamburger style
- Animal-themed
- Cartoon-themed

Year 5 CLOTHING AND TEXTILES

Fashionable earmuffs

1. INQUIRE What purpose do earmuffs serve? How are earmuffs designed and made? Which earmuff designs are popular with children?

2. IMAGINE How will you design your earmuffs so they are fashionable and warm? What material will your earmuffs be made from?

3. PLAN Research how people make earmuffs using felt or fabric. Draw a labelled diagram and write a procedure for making your earmuffs.

4. CREATE Collect the materials, tools and equipment you need. Follow your procedure to make your earmuffs and test they fit your ears.

5. EVALUATE Evaluate the success of your earmuffs. Do they keep your ears warm? Would you wear them? Would you pay money for them?

6. SHARE Record a short video advertisement that can be used to promote your fashionable earmuffs to children who live in cold climates.

Year 6 BUILDING AND CONSTRUCTION

Thatched-roof cabins

Project task:
Design and create a model of a cabin with a thatched roof to display in a museum exhibition about past and present houses.

Project ideas:

- Straw/Hay/Straw
- Clay
- Stones
- Popsticks
- Natural items from trees (twigs)
- Twine

Year 6 BUILDING AND CONSTRUCTION

Thatched-roof cabins

1. INQUIRE What is a thatched-roof cabin? Why did people build houses with thatched roofs? Which materials were used to build these houses?

2. IMAGINE Which materials will you use to represent the types of building materials used in the past? How will you make your cabin?

3. PLAN Draw a diagram of your cabin. Label the main parts and the materials you will use, then record steps for making your cabin.

4. CREATE Collect the materials, tools and equipment you need. Use your diagram and the steps you recorded to safely make your cabin.

5. EVALUATE Evaluate the success of your cabin. Did it show how thatched-roof houses were made in the past? Was it structurally sound?

6. SHARE Display your thatched-roof cabin in a pretend museum exhibition and explain how and why these houses were made in the past.

REVIEW 'These projects will provide a rich, well-structured Design and Technologies learning resource for students.'

Bring internet literacy to the classroom

Develop students' ability to read and analyse websites as they refine their online research skills for use in other subjects. Students will also be introduced to online safety, netiquette and ethics to ensure they are confident, safe and effective internet users.

Benefits

- Teaches students how to be safe in an online environment, addressing such topics as phishing scams and acceptable use agreements.
- Encourages positive online behaviour and promotes collaboration through blogs and other tools.
- Develops inquiry skills by exploring how different websites are created for different audiences, and why.

Identity – 2 *Being healthy, safe and active*

A person's physical characteristics, beliefs and values, hobbies and interests contribute to their identity and can be heavily influenced by the people, places and experiences they encounter throughout their life. Sometimes, these experiences can be controlled by the person and other times they cannot.

Who am I?

Regardless of whether a person is female or male, everyone's body looks different. Some physical characteristics such as gender, height, build and body features are brought out of a person's control. However, modern fashions and technology are making changes to these qualities. Physical characteristics such as hair, body weight, posture, visible skin, tattoos, and clothing items also contribute to identity, but changing these is in their control.

The beliefs and values held by an individual are often shaped by family, cultural, social and emotional experiences they have encountered. A person may have specific religious or cultural beliefs which influence their attitudes, behaviour and environments. They may have strong beliefs about other topics such as parenting, ethics, education systems, technology, gender, engagement and environmental protection. Likewise, individuals have different values depending on what is important to them. Family, love, friendship, wealth, money and material possessions are common values among many people. An individual's hobbies highlight what they enjoy doing and are an important part of shaping their

social identity. Hobbies are often fun shared activities with similar hobbies so they can enjoy doing things together. A person may join a team or club, such as a sporting team, gardening club, band or dance group, where they can enjoy their hobby with other interested people. Being part of a group allows a person to meet to learn and discuss not only their personal identity, but experiences a group identity as well.

Likely, a person's interests guide not only what they do in their spare time (hobbies), but also what they want to learn about, the career path they take, their style of music, their taste in movies or books and their lifestyle. At school, a person is exposed to a variety of topics, some they like and some they don't. Topics that interest an individual are often easier to do well and often shape their career path. A person's interests play a role in shaping their personal, cultural and social identities and often change over time as they engage in new experiences.

In conclusion, a person's identity is shaped by how they look, what they believe and their interests. While some people may have similar beliefs, values, hobbies or interests, their identities will never be exactly the same.

A fool-proof formula for keeping boredom away

» 56-page workbooks

» Suitable for Foundation to Year 3

» Improve fluency in maths and English

Stick Kids® workbooks offer engaging activities, games and puzzles that help develop fluency in mathematics and English. Each 56-page book features full-colour activities, a list of skills covered and an explanation of why those skills are important for development. Also included are helpful tips, an answer key, a tracking sheet and stickers for acknowledging achievements.

These handy-sized skill practice workbooks are perfect for use at school, or as entertaining activities on the go. Tuck them into a backpack or travel bag. Great for school holidays and year-long practice.

Sample pages from *Numbers hidden pictures* (ages 4-5)

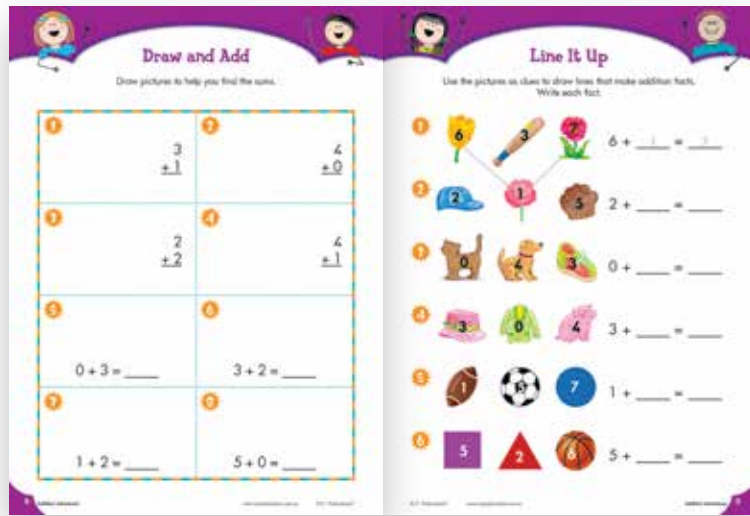

Features

- Each workbook is focused on improving fluency in several targeted key skills. Repeated practice allows your students to build a strong foundation for higher level maths and English skills.
- A range of exciting activities to engage students. Including worksheets, games and puzzles, each of the activities is designed to further students' understanding of the targeted key skill.
- Full colour and durable, these workbooks are extremely handy to use on the go, as well as in the classroom.

Give your students the critical-thinking skills they need to succeed

- » Six-book series
- » Suitable for Years 1 to 6
- » Easy to use and integrate into your existing program

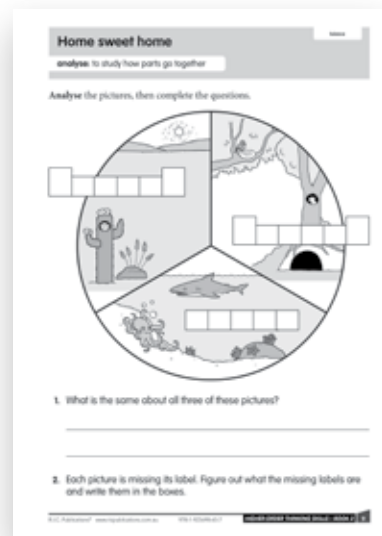

In the fast-paced and ever-changing world we live in, never has there been a more important time to develop critical thinking skills—but how do you fit this into an already-packed schedule?

Higher-order thinking skills is the answer! Through a range of engaging and challenging activities designed to test and strengthen problem-solving skills, this series helps students make deeper connections by integrating their learning across key curriculum areas.

Features

- Engaging logic puzzles, brainteasers and more, to build and grow students' problem-solving skills
- Individual activities, each focusing on a behavioural verb such as *analyse*, *predict* or *design*, while integrating into different curriculum areas
- Themes applicable across all subject areas and in everyday life

TEACHING TIPS

» While focused and engaged students are key to successful learning, the number of students who are disengaged from their education is alarming, and the impact this is having on other students is concerning. Developing a 'check-in' system in the classroom where students can report their feelings to a teacher or an education assistant can be extremely beneficial. 'Check-in' systems allow students to talk through any barriers that might be impacting their ability to engage in a task and provide opportunities for the teacher or education assistant to support/guide students' thoughts, feelings and behaviours in a confidential, safe and timely manner.
